

The Community defibrillator can be found on Gillett Road, located between **L'arte** and **Day Lewis Pharmacy**.

If someone collapses, is unconscious and not breathing normally:

- Call 999 immediately.
- Tell the call handler your location.
- The ambulance service will provide the access code to the cabinet if it is available.
- Ask someone to fetch the community defibrillator.
- Meanwhile follow instructions from the call handler which could include starting CPR and await arrival of the defib. Emergency Services will be on their way.

You do not need any previous training to use a defibrillator. The machine gives clear spoken instructions and will guide you through every step. It is designed for members of the public to use and will only deliver a shock if one is needed.

Every minute counts during a cardiac arrest. Early CPR and early defibrillation can significantly increase a person's chance of survival before the ambulance arrives.

Locations of other defibrillators can be found using the following link:
